

DIVISION PRACTICE - MULTIPLES OF 2

ANSWERS

Connect each number in a cube to a number half its size in a circle.

Mental math. Workout in your head one quarter of each amount.

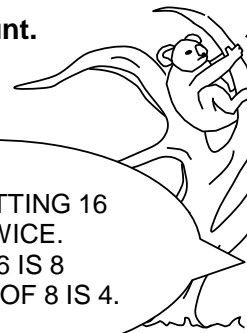

ONE QUARTER IS THE SAME AS DIVIDING BY 4, WHICH IS THE SAME AS DIVIDING BY TWO TWICE.

$$16 \div 4 = 4$$

OR

$$16 \div 2 = 8 \div 2 = 4$$

WE'RE CUTTING 16 IN HALF TWICE. HALF OF 16 IS 8 AND HALF OF 8 IS 4.

IF YOU KNOW HOW TO DIVIDE BY TWO YOU CAN DIVIDE BY 4.

44	11
32	8

84	21
108	27

60	15
92	23

24	6
48	12

12	3
100	25

Fill in the table.

÷	16	88	40	136	56	8	128	160	64	120	72
2	8	44	20	68	28	4	64	80	32	60	36
4	4	22	10	34	14	2	32	40	16	30	18
8	2	11	5	17	7	1	16	20	8	15	9

I SEE A PATTERN IN THIS TABLE. WE KEEP CUTTING THE NUMBERS IN HALF.

Solve the word problems.

Divide 48 by 4. 12

54 shared evenly between 2. 27

How many 4's are in 68? 17

One quarter of 20. 5
