

# WAYS OF WRITING EQUIVALENT RATIOS

NAME:

Write five equivalent ratios for each problem.

Helpful example

4:3      4:3 x 2 = **8:6** or 4:3 x 3 = **12:9** or 4:3 x 5 = **20:15** or 4:3 x 10 = **40:30** or 4:3 x 7 = **28:21**

JUST REMEMBER TO MULTIPLY OR DIVIDE BOTH NUMBERS BY THE SAME VALUE.

1. $\frac{5}{9}$	10. 26:4
2. 10 to 20	11. 3 to 7
3. 60:32	12. $\frac{44}{33}$
4. $\frac{3}{21}$	13. 16 to 30
5. 3 to 2	14. 20:6
6. $\frac{7}{8}$	15. 99 to 36
7. 12:11	16. 180:210
8. 25 to 30	17. $\frac{18}{12}$
9. $\frac{15}{6}$	18. 92:46

YOU SHOULD SIMPLIFY THE RATIO FIRST.  
THEN WRITE THE EQUIVALENT RATIOS.
